ROTARY 2.0 CNC

Automatic 4-axis CNC Copying Shaper

The world's only CNC controlled rotating table system

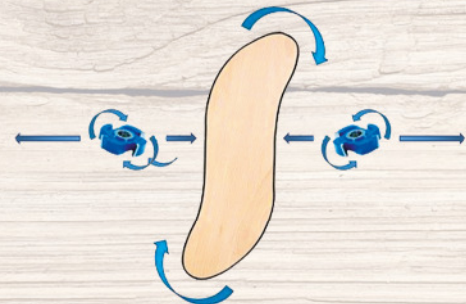

- axis 1: stacking magazine with servo-controlled feeder
- axis 2: rotating table
- axis 3+4: milling devices
- workpiece clamping station
- pneumatic ejection slide
- connections to dust exhaustion
- safety housing
- WOMatec CNC control system
- WOMatec dxf converter
- pneumatic parts FESTO
- servo motors, controllers, touch screen and computer BECKHOFF
- milling motors and frequency converters SEW
- CE certification

&
wood

Possible milling operations

- ➔ milling of 1 contour with 1 cutter (360°)
- ➔ milling of 1 contour with 2 cutters (180°)
- ➔ milling of 2 contours with 2 cutters (360°)
e.g. cutter 1 = preroughing (without radius)
cutter 2 = finishing (with radius)
- ➔ staple processing (up to 3 pieces in one feeder load)

ROTARY 2.0 CNC

Automatic 4-axis CNC Copying Shaper

The world's only CNC controlled rotating table system

Extra equipment for the wooden toothbrush

- double stacking magazine for higher output
- electronic central lubrication system with touch display
- electronic height adjustment for the cutters
- weight-saving construction for higher speed
- software extras for more output and best precision

Your advantages

- high flexibility
- high precision
- high output
- easy to operate
- latest technology
- solid construction
- less dust and noise
- more safety

In our ROTARY 2.0 CNC only parts of globally active brand manufacturers, such as Bosch Rexroth and Parker (hydraulics), Festo (pneumatics), Siemens and Beckhoff (electronics) are mounted, taking into account the highest possible proportion of freely available standard parts. Custom-made products and finishing are realized by WOMAttec or regional partners. A fundamental feature of the design is a solid construction, so that this WOMAttec machine is durable, low-maintenance and wear-resistant as well as easy to operate.
