# STRIP 2.0

## U-profile Strip Brush Machine

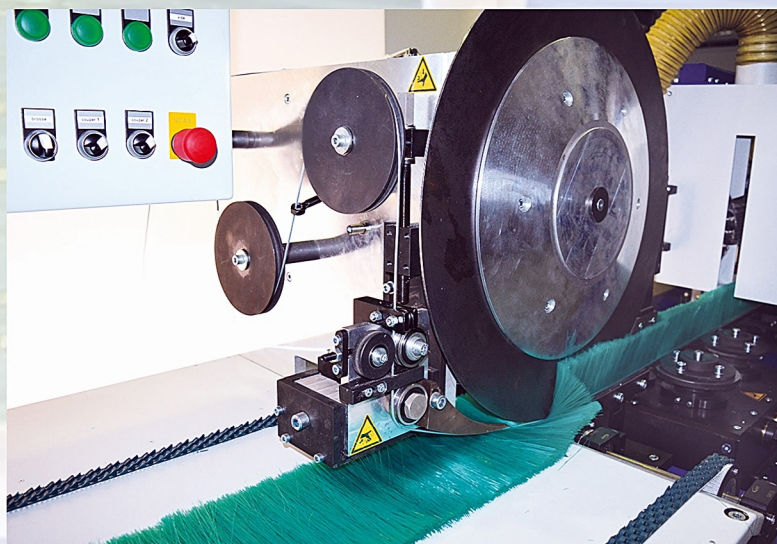

The endurance runner: high mileage at low wear

- proven technology
- comfortable and easy operation
- quick adjustment of back width and filament length
- suitable for any kind of material
- Trimming, Cleaning and Cutting in-line
- loops and winding direction adjustable
- solid welded steel frame
- safety housing
- CE certification

### Technical data

- ➔ back widths between 2.5 and 15 mm
- ➔ filament length from 40 to 400 mm (others on request)
- ➔ variable speed
- ➔ capacity: up to 10 meters per minute
- ➔ electronic length adjustment

## Double Band Strip Brush Machine with Winder

## Cutting Machine

## Y-profile Strip Brush Machine

### Your advantages

- high flexibility
- high precision
- high output
- easy to operate
- latest technology
- solid construction
- less dust and noise
- more safety

*In our strip brush machines only parts of globally active brand manufacturers, such as Bosch Rexroth and Parker (hydraulics), Festo (pneumatics), Siemens and Beckhoff (electronics) are mounted, taking into account the highest possible proportion of freely available standard parts. Custom-made products and finishing are realized by WOMatec or regional partners. A fundamental feature of the design is a solid construction, so that this WOMatec machine is durable, low-maintenance and wear-resistant as well as easy to operate.*
